-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Specification*

1. The disclosure is objected to because of the following informalities: The specification replete with numerous grammatical and idiomatic errors. For example, on page 1, lines 2-3 "the present invention is relating to the lighting device. Especially to the work lamp with grid adopted to the rear side thereof." Is idiomatically incorrect. Applicant is required to correct all such insufficiencies in applicant's next response to this office action.

Appropriate correction is required.

2. The abstract of the disclosure is objected to because the abstract is a run-on sentence and is idiomatically incorrect. Correction is required. See MPEP § 608.01(b).

3. Claims 1-3 are objected to because of the following informalities:

- 1.) In claim 1, the recitation of "the rear portion" lacks an antecedent basis.
- 1.) In claim 1, the recitation of "said halogen" lacks an antecedent basis
- 2.) In claim 2 , the recitation of "the connecting plates" lacks an antecedent basis

Furthermore, claims 1-3 are idiomatically and grammatically incorrect making it very difficult for the examiner to broadly interpret the claims.

***Claim Rejections - 35 USC § 112***

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claim 1-3 are vague and indefinite and appear to be a literal translation into English from a foreign document and are replete with grammatical and idiomatic errors.
6. Claim 2 is rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential structural cooperative relationships of elements, such omission amounting to a gap between the necessary structural connections. See MPEP § 2172.01. The omitted structural cooperative relationships are: the relationship of the connecting plates with the main body of the work light.

Claims 1-3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite in that it fails to point out what is included or excluded by the claim language, because there is no transitional phrase, such as "comprising or consisting of.". This claim is an omnibus type claim. See MPEP 2111.03 Transitional Phrases

**As best understood the following prior art rejection applies to claim 1.**

***Claim Rejections - 35 USC § 102***

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Grossman et al '460. Grossman et al '460 discloses a protective grid of work light which includes a rear portion 12 of a main body 10 of a halogen work light. The protective grid 15 is spaced from the rear portion of the main body.

***Allowable Subject Matter***

It is not clear at this point until the examiner receives an amendment to the claims, if claims 2-3 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

***Prior Art***

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Grossman et al '710, Spitler and Sidabras disclose work lights which are similar to applicant's invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thomas M. Sember whose telephone number is 571-272-2381. The examiner can normally be reached on M-F 8 A.M- 5.30 p.m. first Fridays off.
